New York, March 17 .- A stronger pervaded the dealings in stocks y. When trading began there was nothing in the narrow, uncertain fluc-tuations to indicate that the market would break away from the monotony of recent colorless sessions. The street was filled with bullish rumors, most of them obviously without authentic basis. Two of these rumors which found widest circulation were to the effect that a decision in the railroad rates cases favorable to the roads would be announced shortly and that an important change for the better in the Mexican situation was at hand.

These reports were cited in explana-tion of the rise in quotations. While they influenced stocks to some extent, they influenced stocks to some extent, the movement appeared to be due more directly to the strong technical position. The market had become oversold, owing to bearish efforts of the last few days, which failed to bring out long stocks, and traders found it comparatively easy to run up prices on the shorts.

New Haven was weak at the opening, but rose three points from its low price on President Wilson's intimation that satisfactory progress was being made toward settlement of the company's negotiations with the government. Kansas and Texas preferred again developed pronounced weakness, selling off nearly four points to 42 1-4, the lowest since 1904. It recovered half of its loss on the strength of official assurances that there was apparently no reason why the next dividend payment should not be made. Rumely shares were strengthened by the attempt of arrangements for extension of the company's note issue. Copper shares were benefited by the rise in the metal market abroad and reports of increased local consumption.

The bond market was irregular. Some of the issues which recently had been weak received support. Total sales, par value, \$2,461,000.

THE CLOCK WITHOUT HANDS

The business that attempts to grow without advertising is about as successful as the clock without hands.

All the movements it makes amount to little; for people don't know about them. Yours may be a splendid business; but people are too busy to find it out unless you tell them about it by advertising.

They do know about the business of the fellow who keeps them posted through the columns of this and other newspapers. He invites their trade, and tells them why he wants it; or rather why it is to their advantage to give it to him.

Being a live business man he knows how to treat customers after he gets them. He knows he can make his advertising pay only by living up to his prom-
